Character

I am an active and athletic person. I have built different types of applications in over 15 years of experience as a software engineer. I always make sure I understand the big picture and am knowledgeable in every step of the process. I always make sure that my codes are organized and descriptive with comments. I can quickly fix most issues within a day and my teammates often say I am always fully charged due to my quick actions and response. Most of the time before I start my new task, I always inform the manager or the boss to make sure we're on the same page. I have good communication and interpersonal skills. I can work with others in a team easily. I am a well organized person and always take full responsibility for my job.
